LEATHERWALL COLLECTION 2026

1 of 2

Il respiro della materia

VENTI è il punto di massima espressione della nostra identità e il preludio di ciò che verrà. Celebriamo 20 anni di ricerca costante sulla pelle come rivestimento architettonico.

VENTI preludio incarna l'equilibrio tra design Made in Italy e innovazione, esplorando l'origine della forma e la relazione profonda tra materia e tecnica.

Il design si ispira alla natura, offrendo un percorso visivo dalla precisione del micron alla vastità del sistema, attraverso tre pattern che onorano la storia della pelle e introducono la leggerezza strutturale del sughero.

The breath of material

VENTI *represents the highest expression of our identity and the prelude of what is yet to come. We celebrate 20 years of relentless research into leather as an architectural covering.*

VENTI preludio *embodies the balance between Italian-made design and innovation, exploring the origin of form and the deep relationship between material and technique.*

Inspired by nature, the design offers a visual journey from micron-level precision to the vastness of the system, through three patterns that honor the heritage of leather and introduce the structural lightness of cork.

L' anima strutturale: design circolare e flessibile

La nostra filosofia si fonda sull'etica e sulla ricerca di materiali che possano esaltare la pelle in modo responsabile. La corteccia della *Quercia da Sughero* è un materiale naturalmente rinnovabile la cui raccolta non danneggia l'albero.

Questo supporto ecologico diventa il backing tecnico strutturale ed elemento estetico. Parallelamente, la nostra dedizione alla sostenibilità si conferma nel recupero degli scarti di pelle. Ogni ritaglio viene reimmesso nel ciclo produttivo, riducendo l'impatto ambientale e trovando nuova forma nei pattern modulari.

L'intrinseca flessibilità del sughero ne permette l'applicazione su superfici curve, aprendo il Leatherwall a nuove frontiere di design.

The structural soul: circular and flexible design

Our philosophy is rooted in ethics and in the pursuit of materials capable of enhancing leather in a responsible way. The bark of the Cork Oak is a naturally renewable material whose harvesting does not harm the tree.

This ecological resource becomes both technical structural backing and aesthetic element. In parallel, our commitment to sustainability is reinforced by the upcycling of leather leftovers. Every scrap is reintroduced into the production process, reducing environmental impact and finding new form within modular patterns.

The intrinsic flexibility of cork allows application on curved surfaces, opening Leatherwall to new design frontiers.

CELLULA

L'origine essenziale

CELLULA è il punto zero,
il principio.
Ispirato all'ingrandimento
microscopico della cellula
di sughero, questo pattern
porta in superficie la struttura.

Ogni modulo replica
l'organizzazione scientifica
delle celle.

CELLULA è l'analisi del dettaglio
fondamentale, un DNA
tridimensionale e tattile dove
la forza organica si fonde con la
nobiltà della pelle.

The essential origin

CELLULA *is the zero point,*
the origin.
Inspired by the microscopic
magnification of a cork cell, this
pattern brings the structure to
the surface.

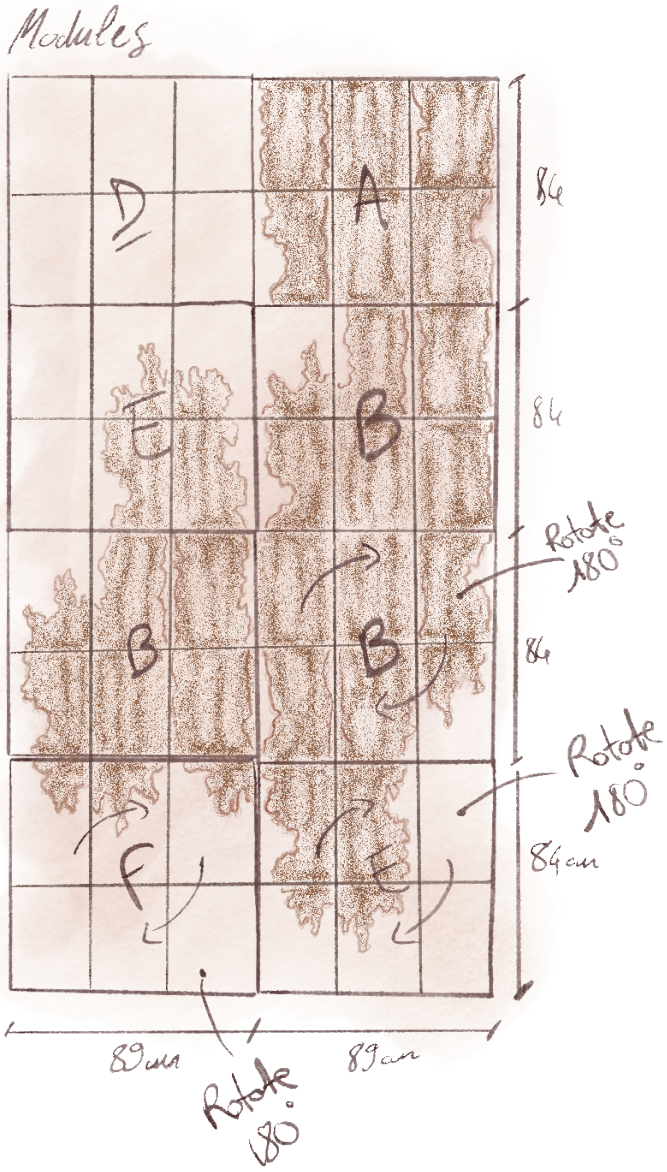

Each module replicates the
scientific organization
of the cells.

CELLULA *is an exploration of*
fundamental detail: a three-
dimensional, tactile DNA where
organic strength merges with the
nobility of leather.

CELLULA arancio

I moduli si sviluppano seguendo un ritmo verticale.

Mudules are arranged in a vertical rhythm.

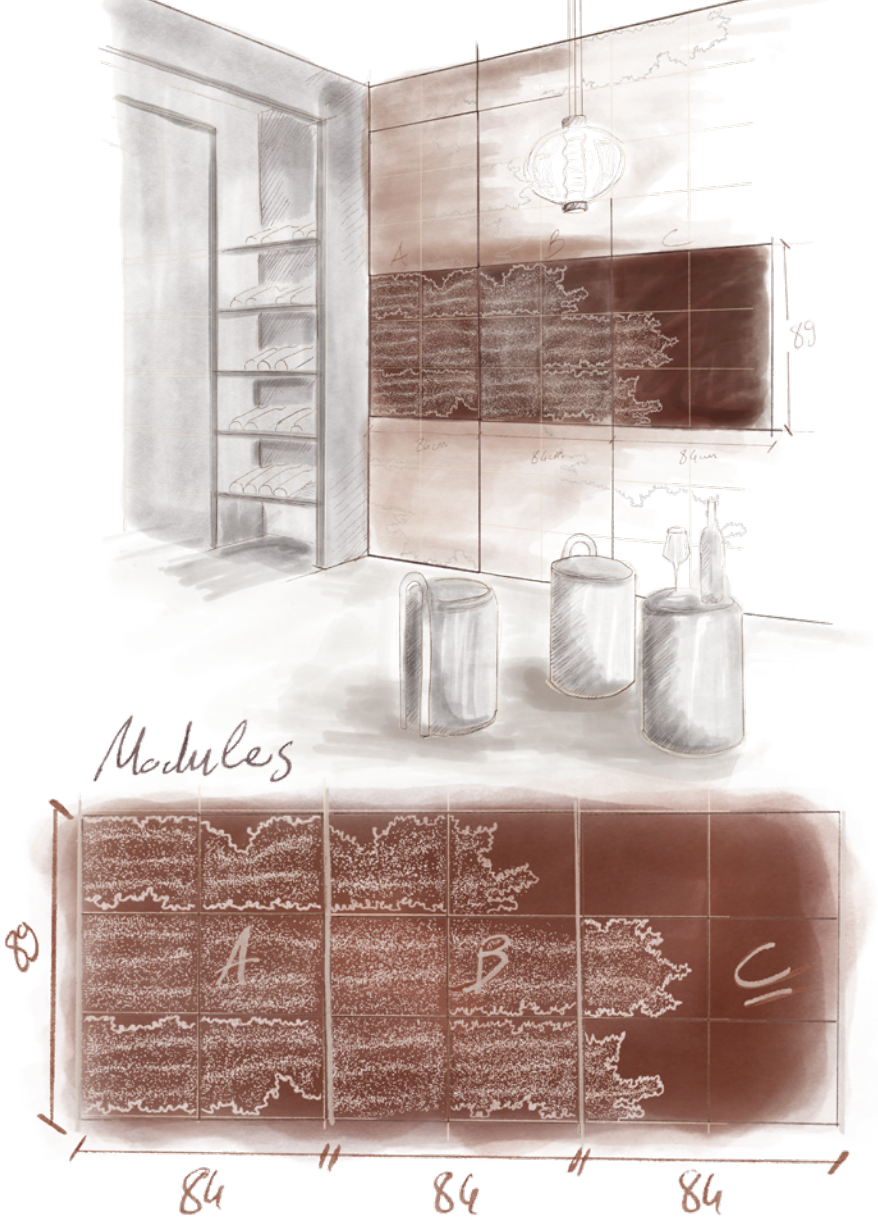

CELLULA antilope

CELLULA saddle

CELLULA taupe

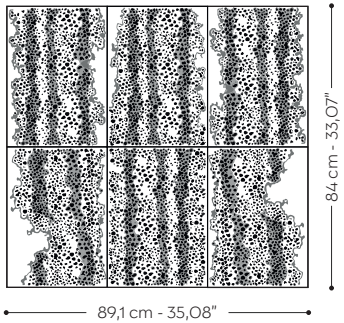

I moduli si estendono in direzione orizzontale.

Modules expand in a horizontal direction.

INFINITO

Il sistema si moltiplica

INFINITO celebra la modularità geometrica ed è un restyling del nostro storico Pattern 8.

Il numero 8 ruota per diventare il simbolo di Infinito (∞), cuore del concetto.

È il sistema in cui la cellula si moltiplica: la ripetizione ordinata di elementi quadrati genera un ritmo visivo dinamico e misurato, che si estende sulla parete senza limiti, valorizzando ogni singolo ritaglio di pelle.

The multiplying system

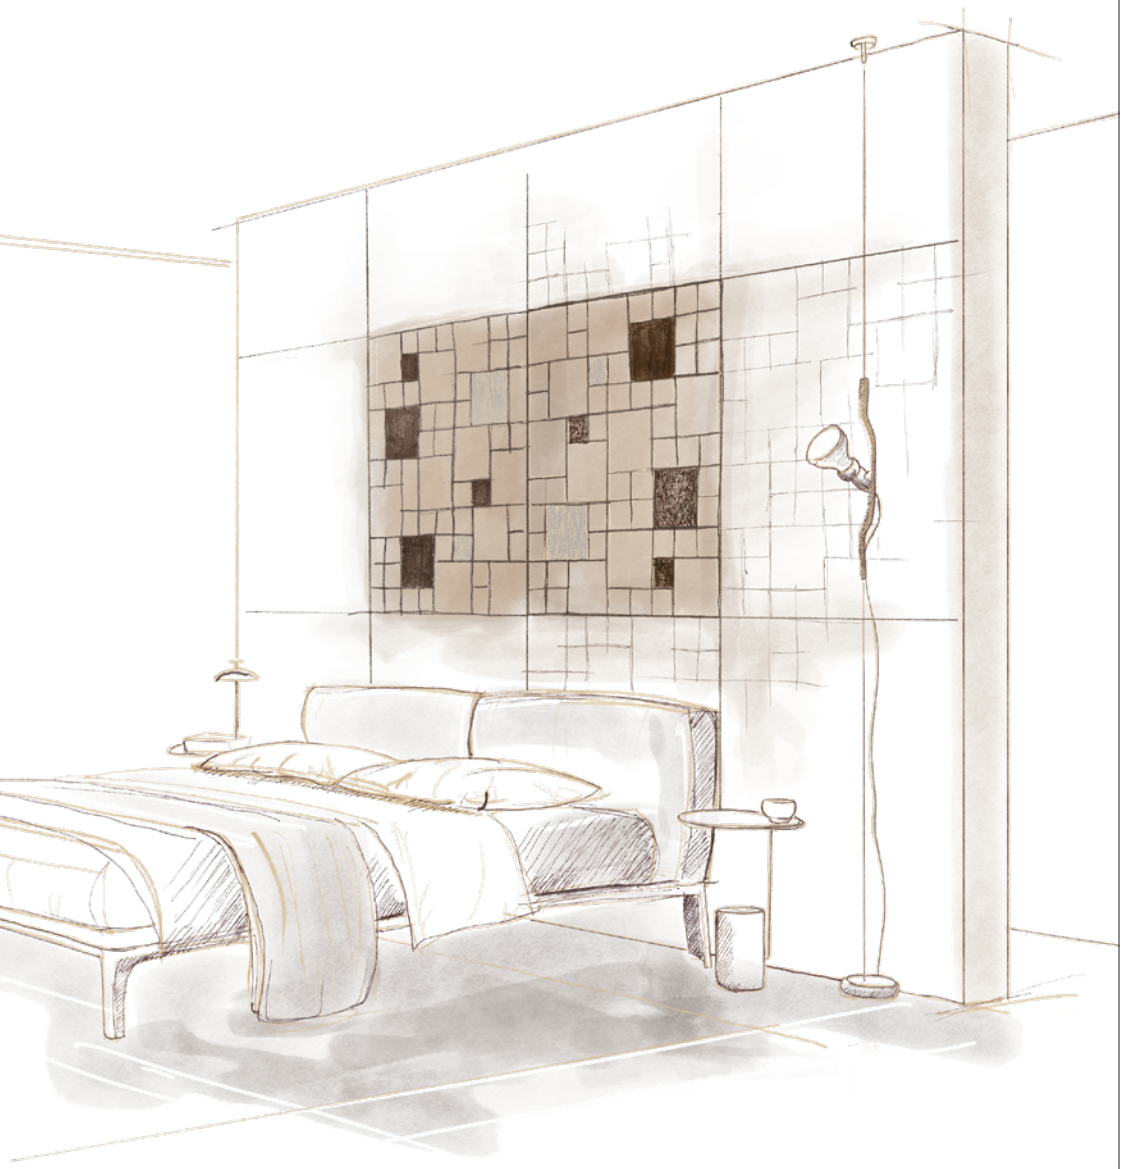

INFINITO celebrates geometric modularity and reinterprets our historic Pattern 8.

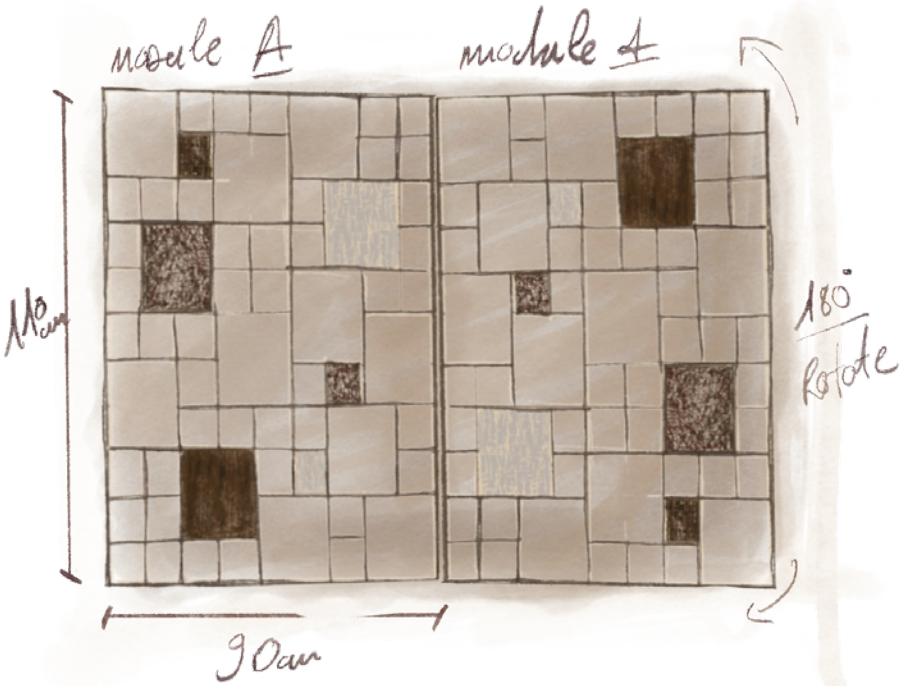

The number 8 rotates to become the Infinity symbol (∞), the core of the concept.

It is the system in which the cell multiplies: the orderly repetition of square elements generates a dynamic, measured visual rhythm that expands infinitely across the wall, enhancing every single piece of leather.

INFINITO tortora

Ruotando un singolo modulo, si aprono nuove possibilità.

By rotating an individual module, new possibilities unfold.

FOLIAGE

Lo slancio vitale

FOLIAGE interpreta l'exploit della crescita. Catturando l'energia vitale della natura, il pattern disegna motivi a foglia che si rincorrono con eleganza e sinuosità. Le linee sottili della pelle creano una trama organica che ricorda le nervature e il percorso della linfa.

FOLIAGE è un rivestimento che fa respirare e crescere lo spazio, fondendo la morbidezza tattile della pelle con la struttura leggera e dinamica del sughero, che ne accompagna il movimento naturale.

Vital momentum

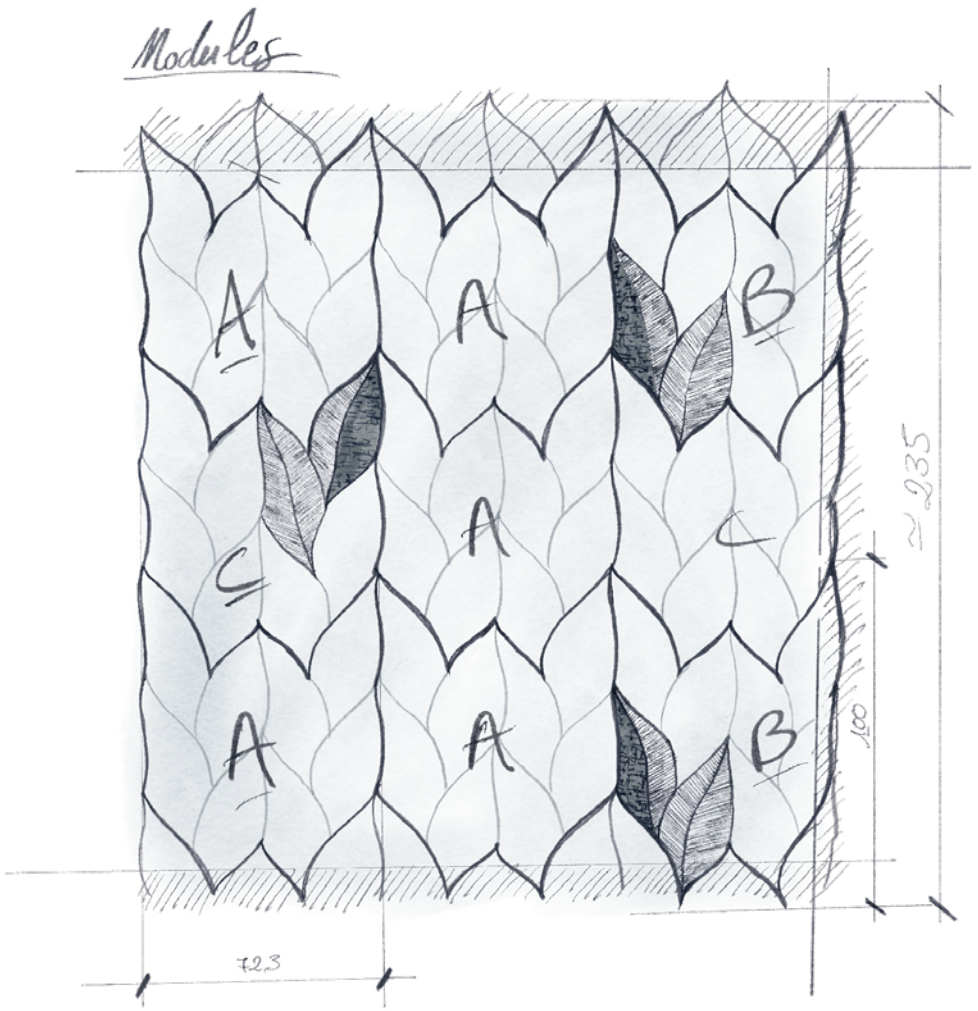

FOLIAGE interprets the surge of growth. Capturing nature's vital energy, the pattern shapes leaf motifs that chase one another with elegance and fluidity. The fine leather lines create an organic texture that evokes the veins and the flow of sap.

FOLIAGE is a wallcovering that allows space to breathe and expand, blending the tactile softness of leather with the light and dynamic structure of cork, which follows its natural movement.

FOLIAGE nuvola

I tre moduli con motivo a foglia si combinano per creare questo pattern

The three leaf modules merge to create this pattern
